Education

CVR College of Engineering | 9.1 CGPA

Jul 2024 - Present

Bachelor of Technology (BTech) | Computer Science & Engineering - Artificial Intelligence & Machine Learning (CS-AIML)

BALAPUR NARAYANA JUNIOR COLLEGE | 96.7%

Jun 2021 - Apr 2023

Intermediate | Intermediate Public Examination (IPE)

Hyderabad Telangana India 501510

Skills

Languages: Python, java, oracle sql, c++, c

Web Development: HTML, CSS, JavaScript, React.js

AI / Machine Learning: TensorFlow, OpenCV, Basic machine learning

Software Development: OOPS in Java, Debugging, Problem Solving, Data Structures and Algorithms, software Testing, Git, Github

Cloud & Devops: AWS basics, CI/CD, Docker, Jenkins

Soft Skills: Team Collaboration, Quick Learning, Analytical thinking, Time Management, Creativity, Presentation Skills, Adaptability

Projects

Task Management System

May 2026 - May 2026

- Developed a web-based Task Management System for creating, organizing, and tracking tasks with deadlines and status updates.
- Implemented CRUD operations, task prioritization, and progress tracking to improve productivity and workflow management.
- Built using Python, Flask, MySQL, HTML, CSS, JavaScript, and Git/GitHub for version control.

Technologies: python, MySQL, HTML, CSS, JavaScript, Git, GitHub, SQLAlchemy, VS Code, Flask

Smart Ride and Platform Recommendation System

Jan 2026 - Mar 2026

- Developed an AI-powered smart ride recommendation platform for comparing ride-hailing services like Uber, Ola, and Rapido in real time.
- Developed an AI-powered smart ride recommendation platform to compare ride-hailing services like Uber, Ola, and Rapido in real time based on fare, distance, travel time, and ratings.
- Implemented machine learning models for fare prediction and intelligent ride recommendations, helping users choose cost-effective travel options efficiently.
- Built a unified web application using Python, Flask, MySQL, HTML, CSS, JavaScript, scikit-learn, and integrated maps APIs for route optimization and navigation.

Technologies: Python, Flask, scikit-learn, MySQL, HTML5, CSS3, JavaScript, OpenStreetMap API, OpenRouteService API, GitHub

Jarvis AI virtual Assistant

Apr 2026 - May 2026

- Developed an AI-powered virtual assistant capable of voice recognition and real-time voice responses.
- Implemented desktop automation features such as opening applications, web browsing, and taking screenshots.
- Integrated AI chat, wake word detection ("Hey Jarvis"), and face recognition authentication for smart interaction.
- Built a modern GUI-based assistant using Python with automation, computer vision, and speech processing technologies.

Technologies: OpenCV, customTKinter, face recognition, github, git, PyAutoGUI, Wikipedia API, speech recognition
